

Wi-Fi baropodometric platforms

High acquisition rate,
maximum versatility

The pursuit of perfection

Research and innovation drove us to design and produce platforms connecting to PC in Wi-Fi mode.

Wi-Feet is a baropodometric sensorized system with 54 Mbit/s (Megabit for second) PC connection speed, ensuring high capacity of acquisition. It is equipped with two rechargeable batteries, that allow a very flexible use.

Highlights

- 54 Mbit/s PC - platform communication;
- Wi-Fi Standard IEEE 802.11 connection;
- Acquisition capacity: over 100 frames/sec;
- High speed evaluation;
- Long life double battery pack;
- 3 different dimensions available (freeMed 40x40 – 60x50 – 80x40).
